Subject: Re: West Lake Landfill Report

Hello:

I have checked the report so I appreciate the link. I would like to also see if there were any powerpoint presentations or handouts given at the public forum that might be publicly available or are the November and January fact sheets I saw online the only available material?

If there is any more available information, please let me know.

Thank you,
Dave

Dave,

Most likely the report that you referenced in your voice mail message is the ground water report from December 2012, which can be found on this page. (Go to the Missouri section and look under the West Lake Landfill heading...it should be the third listed document. The second listed document is a fact sheet that was issued prior to the January 17 public meeting in Bridgeton, Mo. It may also be of some help to you.)

Let me know if you need anything further.
